PRODUCT RECALL

MARS WRIGLEY M&M'S CRISPY PRODUCTS

Mars Wrigley is recalling some of our M&M's Crispy products in the United Kingdom. This is due to the presence of a genetically modified organism (GMO) in an ingredient produced by one of our suppliers.

As we put consumers' preferences at the heart of everything we do, Mars Wrigley does not use GMOs in any of our products in Europe. Further, there is no GMO authorised for this ingredient under UK law and so the products must be recalled.

This recall applies to the following formats and batches ONLY:
